CAMERON HODGES

Mesa, AZ • (480) 298-2403 • cameronhodgesit@gmail.com
linkedin.com/in/cameron-hodges-it • github.com/CameronHodges98

TECHNICAL SKILLS

Languages	Python, JavaScript, Java, SQL
Frameworks	React, Node.js, FastAPI
Databases	MongoDB, PostgreSQL, Firebase
Tools	AWS, Chrome Extensions, REST APIs, Git
Core	Automation, System Design, UI/UX, Performance Optimization

PROFESSIONAL EXPERIENCE

Area Manager (Software & Operations Integration) — Nellis Auction, Mesa, AZ
Jan 2025 – Present

- Scaled operations from 8–10K to 15–17K items/day (+70%) while reducing headcount through automation
- Improved processing efficiency (+8% UPH) and reduced gap time by 25%
- Eliminated 100% of non-compliant listings via automated validation systems
- Built internal tools saving 4+ hours/day in manual labor
- Partnered with executive leadership to influence internal tooling roadmap
- Designed load integrity systems eliminating lost inventory and tracking failures
- Owned KPI strategy, labor allocation, and cross-functional optimization
- Led 4 departments during leadership shortages while maintaining output

PROJECTS

Processing Assistance Tool (PAT)

- Chrome extension used by 38 users; +8% efficiency, 100% error elimination

Warehouse Analytics Dashboard

- KPI dashboard approved for corporate roadmap; tracks performance and bottlenecks

Acquisitions & Market Intelligence Platform

- Executive tool for expansion strategy, contract tracking, and competitive analysis

EDUCATION

B.S. Software Engineering — Western Governors University
Expected Aug 2026

A.A.S Programming & Systems Analysis — Mesa Community College
May 2024 • GPA: 3.34

SUMMARY

Software engineer building automation tools in real operational environments, combining technical skill with business insight to deliver scalable solutions.
